

BNL Dutch row houses 1930

Version 1.0

The history

In the 1930ies many Dutch neighborhoods were built in a style dominated by brick and full of detail. These houses are still very popular and they are being copied a lot since the 1990ies. But the models in this set are made after the original 1930ies housing.

These row houses are mainly for the a bit less wealthy middle class, but still certainly R\$\$.

The Models

Wouter Soethout, better known as **w_swietwoot**, made the four models that are contained in this set. He did not have time to lot them and therefore **FrankU** did that for him. And as they are both BNL Team members, this is a BNL cooperation project.

Wouter made two versions of the models: a Dark Nite Version and a Maxis Night Version. The naming of the files says it all. Delete the one you do not need.

For the Dark Nite version you need the Dark Nite mod.

The Lots

The set contains 8 lots.

All lots are R\$\$.

4 lots are Stage 3, 3 wide and 3 deep.

4 lots are Stage 4, 3 wide and 2 deep.

In these lots I use a lot of prop families, so there is a bit of variation. Even the building models vary in random ways.

The Dependencies

The model files are part of the set.

Otherwise you need the following files. Quite common ones, I suppose.
